

RAVENOL Detailing Elixir

Kategorie: Car care products

Artikelnummer: 1360751

RAVENOL Detailing Elixir is a specially formulated ceramic spray coating with a hybrid function. Creates and ensures a very durable protective layer that reliably protects the vehicle against weather and environmental influences as well as road dirt and small debris.

RAVENOL Detailing Elixir also provides an amazing color refreshment for all paintwork, while creating an intensive shine. With its water-repellent effect, it ensures a permanently smooth and clean surface and an optimal visual appearance of the paint on the entire vehicle.

RAVENOL Detailing Elixir works as a stand-alone coating, but is also ideal as a topping layer for existing ceramic-polymer coatings. Suitable for all vehicle paints, matt paints, powder-coated surfaces with clear coat, plastic components, vinyl and PPF stone chip protection films.

Application instructions

RAVENOL Detailing Elixir should be shaken before use and applied at +10°C to a maximum of +30°C. Remaining moisture on the application surface after drying does not impair the effect and application.

RAVENOL Detailing Elixir can be layered within one hour after application. Several layers can be applied to extend the lifetime and durability of the coating. For a particularly good result and long durability, degrease the surface before application.

RAVENOL Detailing Elixir can be applied in two different application methods, always in smaller sections:

First method:

Spray onto the microfiber cloth suitable for paint from our RAVENOL Mikrofaser-tücher Autopflegeset (microfiber cloths car care set) and then spread evenly across the surface without applying pressure until no residue is noticeable.

Second method: Spray onto the desired section of the surface directly and then spread evenly, also without applying pressure. Then polish the sprayed surface with a second, clean microfiber cloth until it shines, while evening out any excess material.

The individual sections that are coated one after another should always lie next to each other without any gaps in order to achieve an optimal and evenly coated final result.

Note:

RAVENOL Detailing Elixir should be stored in sealed containers in a dry and cool place. Protect from direct sunlight, heat and frost. Keep out of the reach of children. Wash hands thoroughly after use.

Characteristics

- Creates incredibly smooth surfaces
- Ideal as a topping layer for ceramic coatings
- Brings paint and colors to new life
- Impressive wet-look finish
- Coating with strong water-repelling effect
- Gentle on all paints and other coatings
- Also works as a stand-alone product
- Supports all existing coatings
